Profile

Hi there! Thank you for taking the time to read my resume. My name is Thomas and I'm a UI & UX Designer that moved to Amsterdam after finishing his bachelor in Communication and Multimedia Design in The Hague.

For me user experience design does not limited itself to websites. In fact I see it everywhere around me in all kinds of shapes and forms. That's why I like to come up with creative and user centered designs for all kinds of applications and products.

Experience

Woodwing

UI & UX Designer, 2017 - present

At Woodwing I work as a UX/UI Designer on multiple digital asset management systems.

My job involves analyzing business requirements and needs from our customers and translating them into new features. In order to do this I work closely together with multiple development teams, product owners and partners in order to build user centered solutions.

Linx IT Solutions

Projectmanager, UI & UX Designer, 2016 - 2017

Linx IT is a company that develops eCommerce platforms for major companies which include: Tommy Hilfiger, Calvin Klein, Escada and more.

It was my job as the lead UX/UI designer to come up with solutions to user needs and (re)design content management systems. As a projectmanager I worked together with multiple teams of programmers to create, test and improve the systems.

Wentzelmedia

Freelance, all-round designer, 2015 - present

As an all-round freelance designer I helped small, medium and startup businesses with their website, logo, corporate identity, video and artwork.

MediaBridges

Intern Interaction Design, 2014 - 2015

My graduation project was to design an interactive tv channel that helped seniors with their physiotherapy exercises. These exercises had to be selected by physiotherapists that in their turn also needed a system tailored to their needs.

Music Entertainment bookings

Intern allround designer, 2012 - 2013

During my internship at MEB I worked on multiple projects such as designing, testing and improving websites. During this period I got my first experience of working together with internal and remote development teams.

I also worked on graphic design assignments such as developing house styles, artist profiles and online/offline promotion materials.

Education

The Hague University

Den Haag, 2010 - 2015

Wordpress

Hobbies

Hang gliding

I started hang gliding together with my father and brothers in 2008. After I got my license we've been to the mountains in Italy, Austria and France to fly with other members of our club.

Music

I've always had an above average passion when it comes to electronic music. Over the years, the hobby became more serious and I started playing in clubs in The Hague and Amsterdam. These days I dj and produce under the name Duo Lane.

Gaming & Gadgets

Ever since I was a kid I've been obsessed by videogames, gadgets, hardware and computers.
